# Project description

Radicalization in all different shapes and sizes gets often overlooked in today's world. Often do people close their eyes to the sight of something unpleasant. Probably because of that thought that just you, just one person can't do much, or maybe you don't know what the actual solution might be, or for any other reason. Wouldn't it be a small step forward for humanity to encourage a group of young people to think about what they can do to make a change towards the better, to put their minds into the topic, to share all sorts of ideas for a better world together, and implement some of them? The goal of this youth exchange would be exactly that, starting from understanding the terms of radicalization, discrimination, racism, nationalism, and so on, through sharing experiences and ideas with a touch of art, the most versatile way of making a point and letting your voice be heard. In the end, all of the gained knowledge will be brought to the streets via street theater and a photo exhibition. We hope to be a domino piece falling onto another that will make the one after it move, and in that way do our part in making the world a little better place to live in, because in the same moment we are having an inverse situation happening in the same time that the radical acts are overlooked, the radicalized themselves get overlooked, leading to confusion, feeling of isolation and loneliness which is making them, so to say, an easy target to radicalized groups that present themselves as a place where you can easily fit in and satisfy the need of socializing, but with a controversial ideology behind it.

# Homework

- Each participant should bring at least one local newspaper ( doesn't matter what the topic is)
- Preparing of presentations by country about groups that are discriminated in their countries, general prejudices and stereotypes that usually people have
- Preparing of presentations by country about radical groups in their countries and what kind of movements are these groups doing

# The organisers

Mostar Friedensprojekt e.V. is a non-governmental, non-for-profit organization, established in 1994 in Potsdam, Germany. The association organizes socio-cultural activities, artistic and cultural events and publications at the local, regional and national level. For many years it has offered information, general advice as well as humanitarian support to Bosnian refugees and asylum seekers in the region of Brandenburg and Berlin. In Bosnia and Herzegovina Mostar Friedensprojekt e.V. maintains until today an orthopedic workshop and a center of cultural encounter in Bosnia.

The most important aim of Mostar Friedensprojekt e.V. today is to encourage and promote youth workers and young people in their active involvement against racism and xenophobia with democratic means and to oppose prejudices and social exclusion in Germany and throughout Europe. The association continuously develops new forms and methods of intercultural learning about political, social, and cultural issues. It promotes tolerance and understanding for the diversity of cultures and social behaviors and provides political education at the local and regional level in the states of Brandenburg and Berlin and through its branch office in Kljuc in Bosnia and Herzegovina.
